Quincy, Massachusetts . . .

Quincy is located on Quincy Bay on the southerly end of Boston Harbor. It is bounded on the north by Boston, on the west by Milton and Randolph, southerly by Weymouth and Braintree, and on the east by Boston Harbor.

Quincy is 42 feet above sea level. It has an area of 16.8 square miles, a population estimated to be in excess of 85,000 persons, and a population density of 5,083 persons per square mile.

Quincy was settled in 1625; incorporated into the Town of Braintree in 1640. In 1792 it became the Town of Quincy, separating from Braintree; and in 1888 it received a charter making it a city.

Quincy is the birthplace of two of our Nation's Presidents, John Adams, the second President, and John Quincy Adams, his son and sixth President. It is also the original home of John Hancock and many other noted patriots and statesmen.

Quincy is both suburban and industrial — some of its more noted industries being those of shipbuilding, granite, packaging machinery, rivets, telephone equipment, and yachts.

Quincy is a large retail trade center, serving the needs of some 200,000 consumers.

Honorable Charles A. Ross
Mayor

Office of The Mayor

QUINCY, MASS.

Inaugural address delivered by Hon. Charles A. Ross, Mayor of Quincy, to members of the City Council on January 6, 1947.

GENTLEMEN OF THE CITY COUNCIL:

Each year, on the first Monday of January, as we convene to begin our service to the City of Quincy, we must of necessity, be filled with a feeling of hope and courage in approaching all the problems which lie ahead. I feel certain that while we all recognize that there will be many trying days, nevertheless we approach the year 1947 with a sincere determination to render the utmost excellence in our public service.

Our hope and courage in approaching our duties for this year are made more strong and firm by the realization that we have all completed a year which has presented us with manifold problems—and that year we have concluded successfully and I am sure most satisfactorily. The splendid efforts of the members of the Council and their outstanding service to the citizens of Quincy has my utmost respect. I commend very highly their cooperation with me and I look forward to the splendid relations of unified effort continuing in the future. Whatever success we are to achieve this year, whatever problems we have to meet and overcome, whatever benefits of good government we are to render to the City of Quincy, can be accomplishd only by our sincere desire to be of mutual service. We have had many conferences together in the past and I anticipate that we will have many conferences together during the coming year.

All of us are experienced enough in public service to recognize the duty which we owe to the general public and we are all men of sufficient maturity to appreciate that there is no mystery about city government. The best services which we can afford should be rendered to the general public, such services, however ,must necessarily be within the financial ability of the city to render. Our task is to provide such services, municipal improvements, better working conditions for our employees, better hospital, school and health facilities for the general public and to provide such benefits to the public for the lowest possible cost.

The cost of government is a paramount issue in every hamlet, municipality and every government agency today. We appreciate that our costs are constantly rising. This increase is due primarily to increased living costs, increases in costs of materials, supplies, labor and all the other costs that go into making up the operation of government. It is elementary that the money must be raised to pay for these increased costs. I am submitting today an order to the Council, totalling over half a million dollars, to provide for the payment of a bonus to our city employees. This one item alone, together with increases in

budget requirement from all city departments, represents a very substantial increase in the tax rate. Outside of the present receipts from our own public services and those receipts which are provided for us by the state legislature and some aid given us by the federal government for welfare, we must look to real estate to raise the necessary funds required. All of us wish to avoid too great a rise in the tax rate. It has been the policy of this administration to maintain the tax rate so far as possible at a minimum level. I do not feel that this year we can maintain our rate of $30.00. It is quite apparent to the members of the Council and to all our citizenry that a rise in the tax rate is inevitable.

To some degree the burden of government must be lifted from real estate and part at least of the increased cost must be secured from other sources. Municipalities by themselves can do nothing in this regard. The Mass. Mayors' and Selectmens' Association, conscious of this situation has prepared a legislative program providing for revision of the state's financial structure to provide distribution of additional funds to cities and towns to relieve the burden on real estate. A meeting in this regard is to be held on January 16th and the program which will then be put into definite form has my complete and sincere backing and approval.

An analysis of the recent Inaugural of our newly elected governor makes it apparent that he, too, appreciates that something must be done to render assistance to the cities and towns and I am hopeful that his efforts together with our own, will provide some solution to alleviate our present difficulties.

Our own city is in a very excellent financial condition; our debt, both inside and outside the debt limit, has been drastically reduced in the past four years and we are in a position to operate without fear or discouragement. This situation has been brought about by careful planning and as I have mentioned before to the members of the Council, both at their annual assemblage and at other times, we have planned to put ourselves in good financial condition to meet just such circumstances as now confront us.

I have made a determined effort over a period of years to curb any unnecessary expenditures by any of our municipal departments. Many times this has resulted in some questions and some criticism but I know that the members of the Council and the public at large appreciate the fact that it is my responsibility, in my best judgment, to curb, so far as possible, unusual, unnecessary or extravagant expenditures. If that were not done, there would be no control of expenditures by department heads and the various boards in the city.

Not alone must we limit our thinking to costs of those necessary facilities and services which are required from day to day. We also have the responsibility of planning civic improvements and we have the responsibility of accomplishing these civic improvements as soon as possible and completing those that are within our ability to finance.

In the coming year, with restrictions removed or modified, it is my hope that we can complete the construction of the Squantum School and the fire station at Houghs Neck. I also feel keenly on the subject which is now being studied and for which plans have been made, for improvements to our city hospital. The health and medical welfare of the citizens of our city has always been very close to me and I know that the members of the Council have the same feeling.

I again ask that we do not lose sight of necessary improvements to benefit our Quincy Square area which in return improves and increases our position as a growing community and a trading center. Therefore, with conditions perhaps more advantageous, I recommend that Revere Road, from Hancock Street, through Canal Street to the Southern Artery be widened to a sufficient width to permit the free and easy flow of traffic.

I also again recommend that Cottage Street, between Cottage Avenue and Revere Road, be widened to a width not in excess of 50 feet.

A subject which has been previously much discussed but on which activity was limited due to conditions, is the subject of our parks and playgrounds. Anticipating a program of new residential construction, both single and multiple units, we are more than ever aware of the necessity to provide for the youth of our city, greater and better playground facilities. I feel that the parks and playgrounds now existing may be improved and put to greater use for longer periods of time and it is my intention to engage on a program of intensive study of this situation during the early part of 1947.

In this connection I am conscious of the advisability of undertaking a program of construction and improvement of our municipal stadium. It is apparent that new stands should be erected and the area immediately to the easterly side of the present stadium should be continued to be filled with solid fill.

Last year a Municipal Airport Committee was appointed which rendered a very excellent report on the question submitted to them. Subsequently a committee was appointed in accordance with the requirements of our state statutes which now places us in a position so that if, in the future, a municipal airport should be decided upon, we can take advantage of both state and federal funds.

I know that the members of the Council have thoughts of their own concerning public improvements. Any such recommendations as the members of the Council may care to make, I shall be most happy to consider with them, and to discuss each one and to pick out those that are most meritorious and on which we can launch a program of activity.

In connection with our contemplated building and improvement program, we have, during the past year, engaged the services of an expert, William Stanley Parker, who is working with a committee

and with all department heads to provide us with a suggested six year program. This suggested program will set forth public improvements necessary and recommended and will also contain recommended methods of financing, all based on our ever changing financial condition as the years progress. I am confident that such a report will be most helpful.

I anticipate that many problems will occur which we do not presently visualize. It is my hope that we can solve these problems in the future as we have in the past. I approach this year with a feeling of great confidence and know that by our cooperative effort we are assured of continued success. Your cooperation in the past has deen most sincerely appreciated and in the coming year we can render outstanding service to our community by a continuation of the same cooperation.

City Solicitor

The work of the City Solicitor's Office was carried on during the year 1947 in the usual manner. Conferences were held with the Mayor, City Council, Department Heads, various Boards and civic groups, at which advice was given. Oral and written legal opinions were supplied to the Mayor, City Council and Department Heads. Suits on behalf of the City were commenced and suits against the City were defended. All claims against the City and City Employees involving sidewalk accidents, street accidents, auto accidents, land damage cases, petitions for abatement of taxes, claims under contracts, were supervised and where necessary, were defended. Orders, Ordinances, Land Conveyances, etc., were prepared for action by the City Council and Mayor and contracts involving the City were approved as to form.

City Clerk

The duties of the Office of the City Clerk are numerous and varied.

The Clerk is responsible for the handling of all elections and in conjunction with the Board of Registrars is responsible for the proper registration of voters.

This office records births, deaths and marriages of Quincy residents, occurring both in the City and outside the City, as well as those of non-residents occurring within the City. Certified copies of these records are issued upon request by the proper persons.

	1946	1947
Births Recorded	2,340	2,461
Marriages Recorded	1,259	1,162
Deaths Recorded	880	950
Total Voters Registered	42,069	40,975

Dog Licenses Issued in 1947	
Male	2,037
Female	206
Spayed	1,088
Kennels	11

Various kinds of licenses are issued among which are dog licenses for the County; hunting, fishing and trapping licenses for the State.

The recording of personal mortgages, bills of sale, and discharge of mortgages has increased considerably in 1947.

The Clerk or Assistant Clerk is ex-officio the Clerk of the City Council. As such the Clerk must make record of and keep in file all the proceedings of the Council.

Under the approval of the Industrial Accident Board of Massachusetts, the City Clerk discharges the duties of the local Workmen's Compensation Agent for City employees classified as labor.

License Commission

The Board of License Commissioners is made up of three members whose positions in City Government make them the most qualified to pass judgment upon and issue the various licenses under their jurisdiction. These are the Police Chief, the Fire Chief and the City Clerk.

Hearings are held, according to law, on various types of licenses and permits. Inspections are made before licenses are issued.

The following is a table showing the types of licenses issued and the amount collected by the Board in 1947.

Type of License	Amount Collected
Common Victualler	$ 945.00
Lord's Day	720.00
Garage, gas, repair shops, den. alcohol and in flammables	4,117.50
Motors Nos. 1, 2 and 3	2,715.00
Amusements, Public Halls	320.00
Secondhand and Junk Shops	625.00
Bowling, Billiards and Pool	1,750.00
Liquor	61,000.00
Miscellaneous	910.60
Total	$73,103.10

Engineering Department

During the year 1947, the Office of the City Engineer was kept busy with its usual duties connected with City improvement. Meetings of the City Council and its Finance Committee were attended and estimates furnished when called for.

Its chief duties consisted of surveying and checking street lines for the construction of new streets, curbing, street widening, street rebuilding as well as sewer and drain construction.

The following table will show more clearly the activities of this Department in 1947:

Type of Project	No. of Projects	Feet of Construction
Sewer Construction	36	11,286.
Drain Construction	23	6,321.7
Granite Curb Reset	4	2,886.
Streets Rebuilt	9	7,815.
Amesite Sidewalks Constructed	15	29,404.
Concrete Curb Installed	9	6,573.
Granite Curb Installed	29	21,987.
Street Widenings	4	—
Granolithic Streets Constructed	7	1,619.
Accepted Streets Constructed	20*	9,943.
Streets Accepted by the Council	18	10,121.

* Six streets built or being built under contract.

Planning Board

The Planning Board consists of five members and a Clerk, who is the City Engineer.

During 1947, meetings and public hearings were held on various phases of the zoning ordinance and recommendations made to the City Council. The Board also concerned itself with ways and means to encourage the development of the City, generally.

Records of yearly proceedings are kept on file with the City Engineer.

Board of Survey

The Board of Survey is composed of three members and the City Engineer who acts as Clerk. The chief function of this board is to hold hearings on petitions for the laying-out of new streets.

During 1947, seven hearings were held on petitions for street lay-outs. Final approval was voted on all but two of these petitions.

Purchasing Department

The Purchasing Department is responsible for the purchasing of all supplies and materials for the City with the exception of food and medicines for the City Hospital and food and clothing for the Welfare Department.

This department is required to invite proposals on all purchases ranging from $200. to $500. in cost, from at least three sources of supply. On purchases amounting to $500. or more, the Purchasing Department is required to advertise for and enter into contract for the City as set forth in the General Laws of Massachusetts.

The following figures summarize the activities of the Purchasing Department for 1947:

Requisitions received from Municipal Depts.		7,055
Purchase Orders placed		9,263
Quincy Orders	5,371	
Boston Orders	3,317	
Outside—Boston Orders	575	
Contracts		67

SECTION II

PROTECTION OF PERSONS AND PROPERTY

POLICE DEPARTMENT
FIRE DEPARTMENT
FIRE AND POLICE SIGNALS
SEALER OF WEIGHTS AND MEASURES
WIRE DEPARTMENT
BUILDING DEPARTMENT
FORESTRY AND GYPSY MOTH

Police Department

QUINCY POLICE STATION

The Police Department, as usual, reports a very busy year for 1947.

During the year, 2,786 arrests were made; of these 2,576 were males and 210 were females. Arrests by months were fairly evenly distributed with the exception of May which showed 382 arrests, almost 100 arrests, in excess of any other month. The records show that 2,527 of those arrested were native born and 259 were foreign born.

TRAFFIC BUREAU

Accidents	586
Persons Injured	623
Persons Killed	5
Prosecutions	668
Warnings to Motor Vehicle Violators	461
Tags Issued	8,205
Auto Sale Transfers Received	6,703
Bicycle Registrations Issued	493

JUVENILE BUREAU

Juvenile Court Cases	177
Informal Hearings at Probation Office	11
Informal Hearings at Police Headquarters	125
Malicious Damage to Property	89
Miscellaneous Investigations	78

The Department maintains a very active Bureau of Investigation. During 1947, a total of 272 breaks, 33 deaths, 329 larceny cases, 15 robbery cases, and 758 miscellaneous cases were investigated. During the course of these investigations, stolen property valued at $17,585.00 was recovered.

The Liquor Bureau made a total of 8,154 inspections, investigated 67 complaints and on 8 hearings before the license board, 2 liquor licenses were suspended.

The Radio Department, maintaining a two-way transmission to all police vehicles, transmitted 33,375 messages and received 20,492.

There were 376 ambulance calls and 1,761 wagon calls in 1947.

The Photography Bureau was busily engaged in the printing and photographing of 77 prisoners, 90 accident scenes and 20 claims against the City.

PERSONNEL

Title	Number
Chief	1
Captains	4
Lieutenants	8
Sergeants	10
Radio Supervisor	1
Patrolmen	112
Reserves	3
Total	139

Fire Department

CENTRAL FIRE STATION

During 1947, the Quincy Fire Department responded to a total of 2,419 alarms in various sections of the City. This is a decrease of 331 from the 1946 total of 2,750 alarms. Thirteen hundred and eighty-four, or 57 per cent, of these 1947 alarms consisted of calls to grass fires, dump fires and others of a like nature. Three hundred and fifteen, or 13 per cent, of the alarms responded to in 1947 were for dwellings.

The total fire loss for 1947 is estimated at $303,000, an increase of approximately $89,000 over the 1946 total of $213,659.

In fire operations during 1947, the Department reports a total of 301 lines stretched and 7,267 feet of ladder raised. Personnel were absent from quarters on fire duty, 2,179 hours. Engine pumping time amounted to 397 hours; and hydrants were put in use a total of 239 hours. Special service responded to 60 calls using the inhalator on 14 occasions.

Record of Alarms (1947)	
Bell Alarms	708
Telephone Alarms	1698
Still Alarms	1
Multiple Alarms	11
Reported Alarms	12
Total Alarms	2430

Fires by Classification	
Dwellings	315
Mercantile	95
Grass, Dumps, etc.	1384
Automobiles	131
Miscellaneous	303
False	176
Total Mutual Aid	15
Total	2419

There were 176 false alarms in 1947, 10 less than the 1946 total of 186.

The Fire Prevention Bureau is responsible for the inspection of all actual and potential fire hazards, the investigation of fires and the issuance of numerous permits dealing with the use of fire and explosives.

During 1947, a total of 17,055 inspections of all kinds were made. Of these, 12,601 were inspections of stores, factories, and other mercantile establishments. Other inspections included those of homes of three families or more, power oil burners, range burners, sites for gasoline tanks, and underground fuel tanks. One hundred and twenty-five inspections of local schools and hospitals were made in 1947.

Of the 3,258 permits issued in 1947, 1,000 were for outdoor fires and 1,299 were power oil burner permits. Other permits were issued for, to name a few, fireworks, blasting, storing and selling explosives, and for burning paint off buildings.

Two hundred and one complaints were received and investigated, and 67 fire investigations were made in cooperation with the State Fire Marshal's Office.

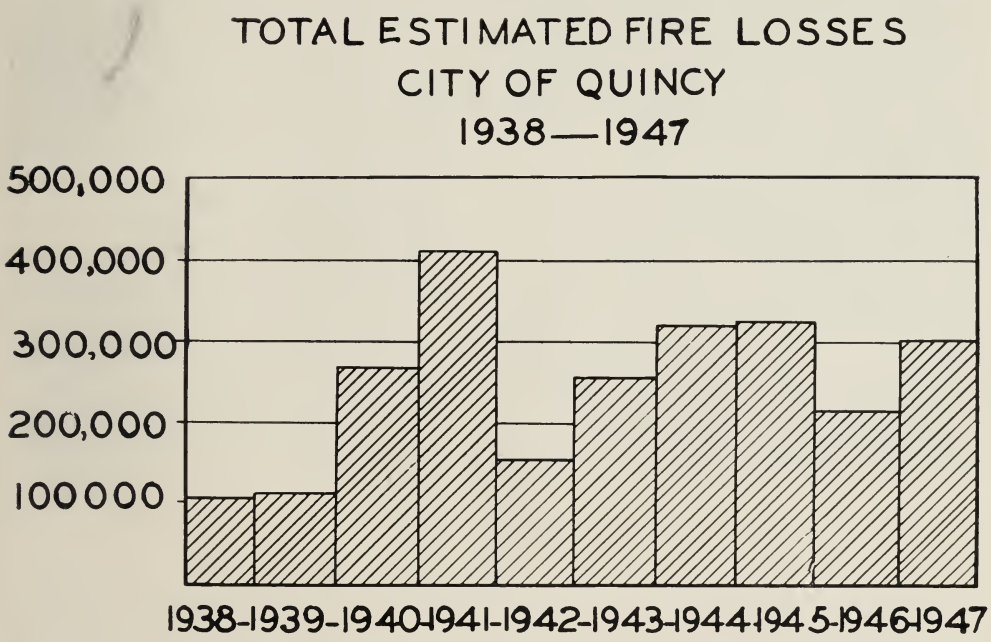
During the year, the personnel of the Department consisted of 136 men, distributed by rank as follows: Chief, 3 Deputy Chiefs, 12 Captains, 11 Lieutenants, 1 Mechanic and 108 Privates.

The apparatus in use by the Department during 1947 is typed as follows:

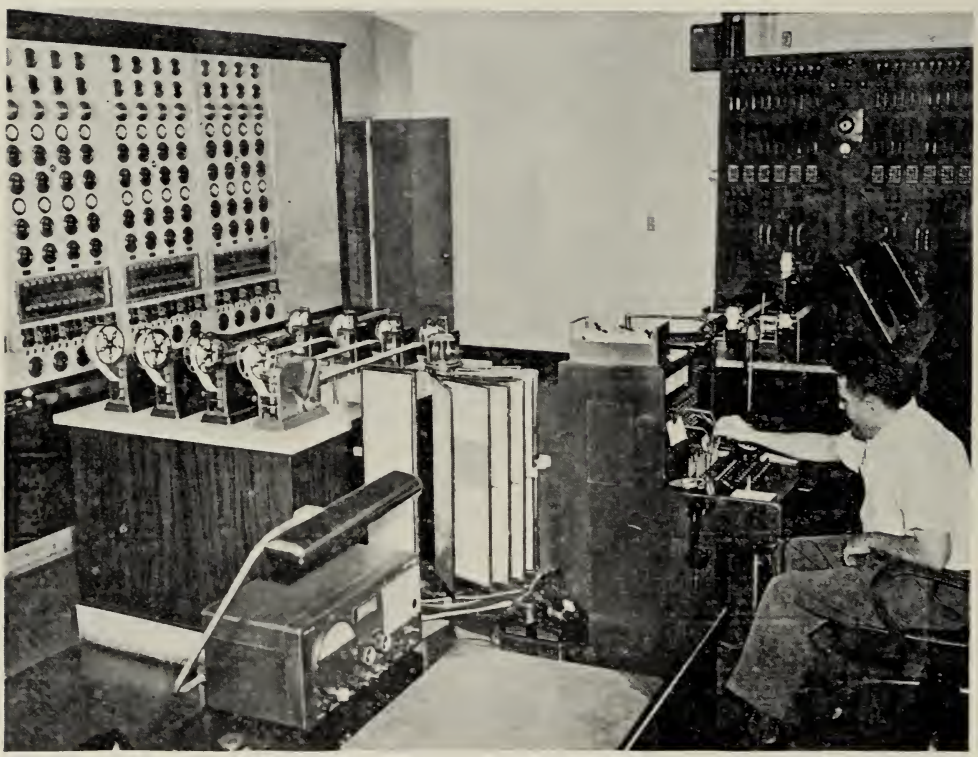
Type	Count	Av. Years of Service	Range in Years of Purchase
Hose Comb.	2	17.5	1929-30
Pumping Engine	9	9.4	1925-47
Aerial Ladder	2	4.5	1940-45
City Service Ladder	2	18.5	1927-30
Special Service	2	8.0	1937-41
Department Cars	3	3.0	1942-46
All Equipment	30	9.5	1925-47

The Department maintains seven stations located in widespread areas of the City.

In the Fall of 1947, the people of Quincy voted favorably on the question of a 48-hour week for firemen. This will increase considerably the number of personnel over the 1947 total of 136 men.



Fire and Police Signals



FIRE ALARM SIGNALS

During 1947, all fire alarm boxes, circuits, and other equipment connected with them were maintained at the highest degree of efficiency; and all police signal boxes and flashlight circuits were maintained at a high degree of efficiency, considering the age of the equipment.

All traffic lights were maintained in good working order, during the year.

The removal of the street cars in Quincy will make it necessary to allocate funds to replace overhead construction by the underground type.

Sealer of Weights and Measures

The Sealer is responsible for the testing of all devices used as criteria of weight or measure for any merchandise bought, sold or exchanged within the City. He is also charged with the reweighing of food and fuel which is packaged for future use.

As a result of his test, the Sealer either seals or condemns a device depending upon whether or not it meets standard requirements.

The following is a summary of the activities of this department for 1947:

	Sealed	Adjusted	Not Sealed	Condemned
Scales	1303	351	47	60
Weights	2865	150	0	9
Volumetric Measures	401	0	0	20
Automatic Liquid Measuring Devices	809	169	488	14
Linear Measures	77	0	0	3
Miscellaneous*	16	0	0	1
Totals	5471	670	535	112

*Taximeters

Seventeen hundred and twenty-four tests were made on reweighing of various commodities; 1089 were found to be correct, 414 under, and 221 overweight.

Clinical thermometers must also be tested for accuracy by this Department. Eight hundred and thirty-one of these were tested by the Sealer in 1947.

The Sealer is also responsible for the enforcement of all laws concerning weights and measures, transient vendors, hawkers and peddlers as well as the quality of coal.

Wire Department

The Wire Inspector, by law, has "supervision of all electric and other wires erected in, upon, over, or under any street or building and of all poles supporting wires or lamps and streetlights."

During 1947, a total of 2,720 permits were issued amounting to $4,883.70 in fees received. Permits for wiring were issued for refrigerators, hot water heaters, electric ranges, lights, oil burners, signs, heat regulators, and gas burners. These required a total of 3,279 inspections by the Wire Inspector. Permits were issued for the installation of new wiring in a total of 56 old buildings, for new wiring in 184 new buildings, and for additional wiring in 2,727 old buildings.

Building Department

In 1947 there was an estimated total of $3,895,827.00 worth of Building Operations in the City of Quincy. This is somewhat in excess of the 1946 total of slightly less than 3 million dollars.

There were altogether 1,851 permits issued for Building Operations by this office in 1947. These were distributed by Wards as follows:

Ward	Permits	Estimated Cost
1	479	$1,083,371.00
2	191	250,381.00
3	208	339,948.00
4	249	814,598.00
5	358	611,005.00
6	366	796,524.00
	1,851	$3,895,827.00

Permits were issued for the following types of Building Operations: one-family dwellings, two-family dwellings, four-family dwellings multi-family dwellings, mercantile, manufacturing, storage, garages, residence alterations, non-residence alterations, removals, elevators, signs, and others. Fees totaling $8,942.50 were collected by the department on the above permits.

During the year, 327 family units were provided through new construction, and 76 were provided through alterations.

Decisions were rendered by the Board of Appeal for the Building Code on twenty-five applications. Twenty-one of these were granted and four rejected. Thirty-seven appeals were brought before the Board of Appeal for zoning. Twenty-three of these were granted, thirteen rejected, and one withdrawn.

During the month of April, this Department tested all fire appliances as required by the General Laws, Chap. 143, Sec. 48.

The Building Department also made its usual Public Safety Inspections and Elevator inspections in 1947, as required by Chap. 143 of the General Laws.

SPRAYING ELMS FOR DUTCH ELM DISEASE

Forestry and Gypsy Moth

This Division, though a part of the Department of Public Works, is by the nature of its principal duties placed in the category of "Protection of Persons and Property".

The chief duty of this Division is the spraying of trees throughout the city in a yearly program of Gypsy Moth Control. The law requires that gypsy moths and browntails be sprayed and destroyed. In addition to this, spraying is also done for Elm leaf beetles, Japanese beetles and other types of tree pests.

D. D. T. spray was used over the entire city in the 1947 tree spraying program. Trees were sprayed on private property on orders of the owners who were billed for this service shortly after the spraying was completed.

In 1947 a special appropriation was made for the control of the Dutch Elm disease which was found to have infected many of the beautiful Elms bordering our streets. Specimens of these trees were first taken and sent to the State for analysis. Trees found badly infected were condemned and many have already been removed. As a part of this program, trees are being sprayed with a high-power spray of agricultural oil. Due to the fact that a large number of trees have been affected, 1948 will see a great deal more work done on this program.

This Division is also responsible for the care and maintenance of all street parks in the City. The City greenhouse raises plants and shrubs of all types for this purpose.

SECTION III

HEALTH AND SANITATION

HEALTH DEPARTMENT
QUINCY CITY HOSPITAL
SEWER DEPARTMENT
SANITARY DEPARTMENT

PROPOSED HEALTH CENTER — HEALTH DEPARTMENT

Health Department

The activities of the Health Department are classified into six divisions, namely: 1. Administration, 2. Contagious Diseases, 3. Child Welfare, 4. Dental, 5. Tuberculosis Control, 6. Inspection.

ADMINISTRATION: This division is responsible, under the Health Commissioner, for the policy-making, and for the administration of the Department as a whole. Statistics are compiled, and complete records of the Department's activities are kept on file. Various licenses and permits are issued by this division, namely: plumbing, milk, ice cream, oleomargarine, poultry, massage, poisonous alcohol, and funeral director's licenses.

The following are some interesting highlights of the vital statistics compiled by this office in 1947:

Population	85,384	(est. statistically)
Births	2,040	
Birth Rate	23.9	per 1,000 population
Deaths	815	
Death Rate	9.6	per 1,000 population
Infant Deaths	54	
Infant Death Rate	26.4	per 1,000 live births

Of the 815 deaths that occurred among Quincy residents in 1947, 53% were males and 47% were females; 60% were native born and 40% were foreign born. Diseases of the heart continue to be the leading cause of death, accounting for 297, or 36.4% of the total deaths in 1947. Cancer and Cerebral Hemorrhage follow in that order. These three causes accounted for 64.1% of the total deaths for 1947.

CONTAGIOUS DISEASES: The incidence of reportable diseases for 1947 shows that the frequency of some diseases has fallen below the average for the past five years, while others are considerably higher.

CONTAGIOUS DISEASES
1943 — 1947
(Selected Diseases)

Disease	1947	1946	1945	1944	1943	Yearly Average 1943 - 1947
Animal Bites	179	229	231	209	149	199
Chicken Pox	729	223	92	1320	395	552
Measles	134	1020	42	530	1191	583
Mumps	307	86	559	71	150	235
Scarlet Fever	141	96	123	311	231	180
Whooping Cough	172	98	59	53	89	94

During the year, the Health Department continued its immunization clinics on a regular monthly basis. Hundreds of children attended these clinics, and the attendance was further increased when the Department introduced the combination Diphtheria—Tetanus—Pertussis vaccine into this program. Immunization has been the most important single factor in the decline of the incidence of diphtheria, and it is hoped that the new combination will show the same results with whooping cough.

CHILD WELFARE: The Child Welfare Division conducts six well-baby clinics a week in various sections of the city. Pre-school clinics and orthopedic clinics are held monthly.

Clinic	Number	Attendance	Examined	New
Well-baby	310	2824	2750	776
Pre-school	11	76	76	51
Orthopedic	12	63	63	47
Totals	333	2963	2889	874

A total of 1720 home visits were made as follow-ups of the well-baby clinics. Thirteen hundred and four of these were made to babies under one year of age.

Eight homes for infant boarding were registered, and 22 inspections were made in this regard.

Health Department nurses acted as school nurses for Quincy's three parochial schools.

DENTAL: The Health Department maintains two types of dental service. One, the regular school dental clinics held every school day; the other, pre-school dental clinics held twice weekly. A total of 179 treatment clinics were held in the school service in 1947, with a total attendance of 2161 children. Ninety pre-school dental clinics were held during the year, with 617 children in attendance.

TUBERCULOSIS CONTROL: Although the actual number of new cases of tuberculosis reported in 1947 did not exceed that of previous years, the problem of tuberculosis control is becoming more acute. This is due to the fact that the shortage of hospital facilities is becoming more serious, month by month; so that in 1947, we find conditions more of a problem than ever before. Lack of sufficient hospital facilities has made it necessary for the average patient to wait two months for admission, after filing application. This prolongs the patient's stay in the hospital and increases the danger of the disease spreading further. It is recommended that immediate steps be taken to alleviate this condition.

QUINCY DISPENSARY — HEALTH DEPARTMENT

During 1947 a total of 47 new cases of tuberculosis were reported, making 535 cases of all kinds of tuberculosis on file in 1947.

PATIENTS IN HOSPITALS

(As of Dec. 31, 1947)

Hospital	Number
Norfolk County	46
Lakeville State San.	6
Rutland State San.	1

There were 19 deaths from tuberculosis in 1947; this is somewhat less than the 1946 total of 30 deaths. However, this is not considered to be a significant item, as yet, as it will take some years to determine whether or not this is a favorable trend.

A tuberculosis clinic was held weekly at the Quincy dispensary. At this clinic, examinations were made on 31 new patients, and 36 old patients were re-examined. An "Undernourished and Contact Childrens' Clinic" was held weekly with 84 new cases admitted for examination, and 18 old cases admitted for re-examination.

INSPECTION: One of the most important factors in the prevention and control of communicable diseases is that of the various types of inspection conducted by this division. These are milk, food, plumbing, veterinary, and general sanitary inspections.

MILK: The following are some of the more important statistical facts of this branch of inspection. There is one dairy in Quincy containing 34 cows, producing 300 quarts of milk each day; approximately 12,000 producers in the New England Milk Shed supply milk to the City of Quincy; an average of 35,000 quarters of milk are sold in Quincy each day; 723,379 quarts of ice cream were sold in Quincy in 1947; 820 licenses and permits for the sale and manufacture of milk, ice cream, and also oleo were issued in 1947.

FOODS: During 1947 2563 regular store inspections were made by the Food Inspector. One hundred eighty-two bakery trucks were inspected, and 101 complaints investigated. The following types of food were condemned as unfit for human consumption: meat (1311 lbs.), fish (1967 lbs.), fruit and vegetables (97 lbs.), groceries and canned goods (310 units), bakery products (72 units).

PLUMBING: A total of 1454 applications for various types of plumbing were filed in 1947. Of these, 230 permits were issued for new buildings (208 for dwellings), and 1224 for other types of buildings. An average of 121 permits were issued each month ranging from a low of 97 permits in August to 146 in April.

VETERINARY: Thirty cows were examined in 1947 and found to be in good health. Two hundred thirty-two dogs were quarantined as a precaution against rabies, none developing.

GENERAL SANITARY: All general sanitary inspections of conditions dangerous to public health, outside of those under the jurisdiction of the various inspectors, were carried out by the Administration Division of the Department.

At the present time the Health Department is occupying four offices in the Munroe Building and has its clinics scattered in different buildings throughout the City. Obviously, this does not bring about efficiency. It is recommended that the City take advantage of the Federal funds wrich are available for assistance in erecting a Health Center; thus efficiently housing this Department.

Quincy City Hospital

ADMINISTRATION BUILDING—QUINCY CITY HOSPITAL

During 1947 9,990 patients were admitted to the Hospital. This is an all time high for admissions; it is 499 in excess of the previous high of 9,491 in 1946.

TOTAL PATIENT ADMISSIONS
1938 — 1947

1938	6,298	1943	9,322
1939	6,625	1944	9,211
1940	7,444	1945	8,447
1941	8,308	1946	9,491
1942	9,126	1947	9,990

Hospital experts recommend that not more than 80% of the total bed capacity be occupied at one time. It is recommended that the remaining beds be kept in reserve for fluctuations in demand and for emergencies such as epidemics and catastrophies. This recommendation, however, could not be followed in 1947 as day to day demands for service have maintained the bed occupancy at a peak of 100% at all times.

The American College of Surgeons and the United States Public Health Service recommend that in Massachusetts communities there be five beds available for every 1,000 population. This would mean an increase of 175 beds over the present total of 275 adults' and children's beds if this recommendation were to be followed. The only way this could be realized is by the undertaking of the long contemplated construction plan which calls for the relocation and construction of a new power plant, a nursing wing, and a surgical building with the necessary auxiliary services.

NURSES HOME — QUINCY CITY HOSPITAL

A total of 54 student nurses graduated in 1947, and 23 pre-clinical students entered the Nursing School in September. This is a small first-year class, but it compares favorably with the first-year classes of other Nursing Schools. The total school enrollment has decreased considerably since the United States Cadet Corps was discontinued. Efforts are being made to recruit replacements for this Corps, the month of May was devoted to an intensive campaign in this regard.

During 1947, 30 Senior Cadets affiliated with various hospitals and the Quincy Visiting Nurse Association.

At the end of the year there were 118 graduate nurses (including supervisors, directors, and head nurses) on duty at the Hospital, and 94 students in the School.

In 1947, there were 7,888 X-ray examinations made and 841 treatments done, plus 12 radium treatments. The total of these is an increase of 19.6% over the total for 1946.

During the year, there were 55,581 laboratory tests done at the Hospital. This is the largest number of tests ever made in the laboratory. There was also a total of 155 post-mortem examinations made during the year.

There were 4,514 anesthesias of varied types given at the Hospital in 1947. Of these, 85 were dental anesthesias, 194 were anesthesias given in the accident room, 307 were given in the delivery room, and 3,928 were given in surgery.

The Quincy City Hospital, like many others throughout the country, has been faced with the increasing cost of operation, the rate of which has far exceeded that of income.

Expenditures for salaries and wages in 1947 exceeded those of 1946 by $175,315.22, showing an increase of 36.1%. However, approximately $100,000 of this increase was due to the bonus of $300. given to all City employees. Expenses for general purposes and supplies in 1947, exceeded those of 1946 by $71,604.45, an increase of 23.4%.

Receipts for 1947 showed an increase of $111,673.13, or 18.4%, over those of 1946. Blue Cross payments to the Hospital amounted to approximately $275,000. in 1947.

For the past 22 years, the Thomas Crane Public Library has maintained a branch at the Hospital. This branch has grown from a collection of books in a spare closet to a room, which it now occupies, in the basement of the Administration building. Plans are underway to enlarge this branch in the near future by combining the expanding medical library with the patient service and moving it to Ward A, where more space is available.

The permanent collection of books in the Hospital branch number around 1800 volumes. The adult circulation for 1947 showed a decrease of 3,296 from that of 1946. Th juvenile circulation, however, showed an increase of 1,033 over the previous year.

CIRCULATION (BOOKS AND PERIODICALS)

Adult Fiction	10,548
Adult Nonfiction	5,278
Juvenile Fiction	1,045
Juvenile Nonfiction	629
Total	17,500

The following are comparative statistics for 1946 and 1947. Some of the Hospital services show decreases in 1947; but these are compensated by increases in other types of service.

	1946	1947
Admissions	9,491	9,985
Room Patients	1,139	1,226
Ward Patients	7,536	7,866
Service Patients	816	983
Total Days Treatments	97,130	96,981
Excluding Newborn	81,286	80,987
Newborn	15,844	15,994
Total Daily Average Patients	266	265.7
Excluding Newborn	222.7	221.9
Newborn	43.3	43.8
Outpatients	8,571	10,344
Accidents	4,621	5,457
Prenatal Visits	213	275
Newborn	1,628	1,836
Operations	3,849	5,654
Physiotherapy Treatments	14,746	14,378
Deaths	333	368
Autopsies	131	152
Percentage of Autopsies	39.	41.

Sewer Department

The principal activities of the Sewer Department for the year 1947 consisted of 1. Sewer construction; 2. Particular sewers (sewer connections); 3. Drain construction.

A total of 324 sewer connections were made to the common sewer in 1947. The following is a breakdown of Particular sewers by Wards and building classification:

WARDS		BUILDING CLASSIFICATION	
Ward 1	97	Single Houses	251
Ward 2	17	Two-family Houses	5
Ward 3	32	Four-family Houses	21
Ward 4	64	Business Buildings	47
Ward 5	39		324
Ward 6	74		
Milton	1		
Total	324		

Sewer construction consisted of 2.13 miles of sewer pipe being laid in 36 construction projects.

Under the heading of drain construction, 1.19 miles of drain were constructed in 1947 on various streets.

As of December, 1947, there was a total of 170.082 miles of sewer line in Quincy. Maintenance and repair to these lines was done by inspection, cleaning and flushing but only to those where it was deemed absolutely necessary.

Quincy is included in the South Metropolitan Sewerage System and thus is not responsible for its own sewerage disposal facilities.

CITY GARAGE — DEPT. OF PUBLIC WORKS

Sanitary Division

The Sanitary Division of the Department of Public Works is responsible for the collection and disposal of garbage and rubbish, and for the cleaning of cesspools and vaults, at the owner's expense.

Rubbish collections were made weekly in 1947 and dumping was done at the City Dump on Quarry Street. Garbage collections were made twice weekly, when possible, but at least every five days. Garbage was taken to the rear of the Municipal Garage and from there sold to various farmers.

During 1947, 238 cesspools and 7 vaults were cleaned.

SECTION IV

CHARITIES

DEPARTMENT OF PUBLIC WELFARE
GENERAL RELIEF
AID TO DEPENDENT CHILDREN
OLD AGE ASSISTANCE
CITY PHYSICIAN

Department of Public Welfare

The Department of Public Welfare is set up in three Divisions, namely: General Relief, Aid to Dependent Children, and Old Age Assistance.

GENERAL RELIEF: The title "General Relief" is a complete description of the activities of this Division. Its activities include all problems which do not come under the jurisdiction of Aid to Dependent Children or Old Age Assistance. Typical of the problems which confront General Relief are those resulting from unemployment, illness, intoxication, divorce, desertion, separation, strikes and various other states of need.

The chief problem of this Division during 1947 arose from the decrease in industrial employment in this City due, naturally, to the fact that the Shipyard, Quincy's largest single industry, and several smaller industries did not operate anywhere near capacity. This, coupled with the fact that the Shipyard strike during many weeks of 1947 increased this problem, necessitated relief to many more families.

During the year 1947, this Division was called upon to handle 884 new or reopened cases, involving a total of 4,220 persons. This is an increase of approximately 50% over the total number of persons aided in 1946. General Relief costs for 1947 rose 13.8% over those of 1946. These costs would have been much higher had not the Department carefully screened all cases. This led to the placing of many able-bodied persons in new jobs and the referring of many more to agencies outside the Department for relief. There were 185 case referrals from other cities, towns and hospitals; 88 of these were accepted and 97 denied. There were also 189 referrals from the Quincy City Hospital. Acknowledgements of 276 cases were received from other cities and towns.

The housing problem became more acute in 1947 and the Department was obliged to use emergency measures, such as housing families in all kinds of dwellings, stores, warehouses and the like, in order to keep them off the streets.

CLINIC AND DISPENSARY: The increased number of welfare cases made it necessary to operate the clinic two days a week throughout the year. A total of 735 patients were treated at the clinic, maintained by a staff which included a physician (the City physician), nurse, pharmacist, and a social worker.

CITY HOME: Besides caring for its usual inhabitants, the Home in 1947 was filled to capacity on many occasions due to the housing shortage. No less than 14 evicted families were given shelter there during the year. Persons made homeless by disasters were also cared for in the Home during 1947.

AID TO DEPENDENT CHILDREN: Originally set up for widows with children, this Division during recent years has, by the enactment of liberalized laws, included under its jurisdiction mothers who are divorced, legally separated or those whose husbands are serving long prison sentences. Case totals in this Division showed little month to month fluctuation, averaging from 107 to 109 cases per month.

Due to the increased cost of living, the state revised the Standard Budget figures effective September 1, 1947, which should further increase the total cost of assistance in 1948 over that of 1947. However, the new method of budgeting income from employed children, resulted in a net decrease in assistance cost to a few cases in 1947.

OLD AGE ASSISTANCE: Though there were no substantial changes in the Old Age Assistance law in 1947, the State Department of Public Welfare did liberalize the requirements for eligibility as well as food budgets and hospitalization, which were the major factors in the increase of total assistance costs in this Division. During 1947 a total of 1,226 cases were handled by this Division. This is an increase of 10.9% over the 1946 total of 1,105 cases.

Material savings were affected in this Division by many new policies established in 1947. An example of this is the unification of drug pricing which reduced that particular cost by 19%.

Assistance in this Division will become larger and larger in the future unless the Federal Government greatly liberalizes its Social Security benefits. At present, Old Age Assistance is supplementing meager benefits given many under Social Security.

CITY PHYSICIAN

The City Physician has many medical duties connected with the function of municipal government. As usual the Physician reports a busy year during 1947.

ACTIVITIES OF THE CITY PHYSICIAN — 1947

Number of house visits	586
Number of office calls	25
Number of patients treated at clinics	742
Number of patients referred to eyes, ears, nose and throat specialist	41
Number of vaccinations	15
Number of operations and special treatments	15
Number of physical examinations	370
Number of police calls	22

The City Physician is also in regular attendance at Welfare Department clinics held twice weekly.

SECTION V

DEPARTMENT OF VETERANS' SERVICE

ADAMS ACADEMY — DEPT. OF VETERANS SERVICES

Department of Veterans' Services

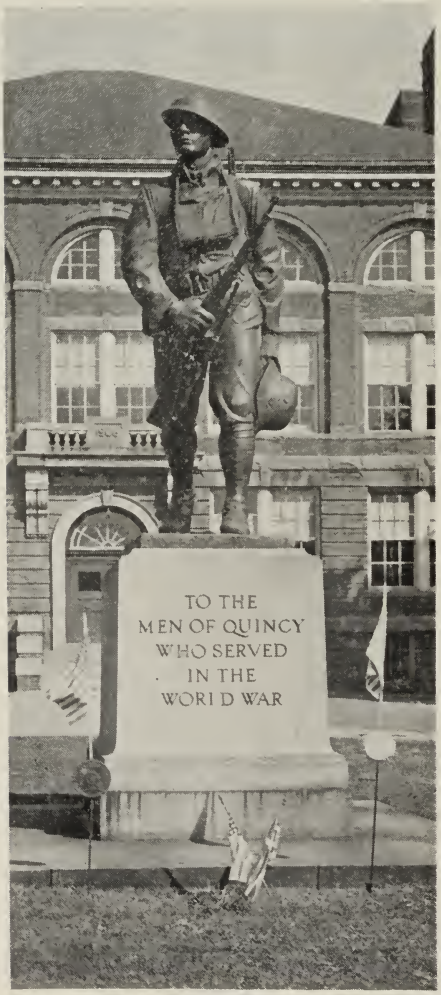
The Department of Veterans' Services was created by the City Council in 1943 and set up in operation the early part of 1944. Since that time, however, the activities of this Department have increased in both scope and magnitude so that in 1947 we find the Veterans' Services undergoing a radical change.

The State Legislature passed a law made effective January 1, 1947, which reimburses the City one-half the total expenses incurred by the City in assisting veterans and their dependents, depending upon compliance with the rules and regulations of the State Department of Veterans' Services. Previously all these expenses were met by the City.

During 1947, 18,841 visits were made to the office for advice and assistance by veterans and their dependents. The majority of these requests were concerned with education, G.I. training, insurance, job placement, legal advice, hospitalization, disability claims, pen-

sions, evictions and home loans. Of the 1,047 investigations made on requests for financial assistance, 415 were aided. Some of the others were found to have either sufficient funds in banks or other employment. Others were placed in permanent employment. It is interesting to note that only about 30% of those seeking financial assistance are veterans themselves. The remaining 70% are either dependent parents or widows and children of veterans.

Whereas in 1945 and 1946, immediately after the cessation of hostilities, the most frequent problems concerned those of education and Government sponsored job training, in 1947 the questions asked most frequently were those dealing with service incurred disabilities, disability claims, housing and insurance. Thus it becomes increasingly evident that although a large number have settled themselves in school or employment, others have problems which are becoming more and more acute.



DOUGHBOY

A surprising number of veterans are in immediate need of psychiatric treatment or hospitalization for psychiatric reasons. Prompt treatment is needed for many of these. Although the Government has "emergency" lists for their already overcrowded hospitals, many veterans need immediate care before they enter the category of "emergency" cases.

This Department gives, free of charge, aptitude testing to those veterans requesting it, as well as education advice.

A careful survey of other Veterans' Services Departments throughout the State shows that Quincy has as complete a service as can be found in the State.

SECTION VI

HIGHWAY
MUNICIPAL BUILDINGS
HARBOR MASTER
PARKS DEPARTMENT
CEMETERY DIVISION

QUINCY TRAFFIC CIRCLE AT FORE RIVER BRIDGE

Department of Public Works

The activities of the Highway Division are divided into the following categories: 1. General Maintenance; 2. Street Lighting; 3. Highway Miscellaneous; 4. Curbing, Sidewalk and Street Construction.

1. GENERAL MAINTENANCE: This Division is responsible for street cleaning, street repairs, sidewalk repairs, maintenance of highway equipment, drain maintenance and snow removal.

The early months of 1947 saw little or no snow on the ground; however, in the last ten days of the year we had a very heavy snowfall, amounting to almost record proportions with each day. This necessitated heavy expenditures for snow removal, plowing and sanding. This task was aided somewhat by the arrival of a new Snow Fighter in the Fall, to supplement the snow removal equipment already on hand.

2. STREET LIGHTING: Besides expenditures on street lights and traffic lights, this Division is also responsible for lights on railroad overpasses and subways as well as lights for skating rinks and football practice fields.

Late in 1947, a survey of the lighting conditions on Quincy Avenue was conducted. As a result, greater candle power lamps were installed as an aid in the elimination of the hazardous lighting conditions on this road.

3. HIGHWAY MISCELLANEOUS: This category includes the care of bridges, fences, brooks, and many other incidental items such as the erection of stands for public Christmas trees.

Several bridges were repaired during 1947 and all fences were maintained in good condition. Wooden signs of all types were made up by the painters, ranging from "no parking" to "sickness — quiet" signs.

During the Spring, 160 crosswalks and more than 8 miles of street center lines were painted.
center line were painted.

4. STREET CONSTRUCTION: A special appropriation was passed for the installation of granite and concrete curbing on certain streets, and sidewalk construction in 1947. New construction was completed on 12 streets during the year and 12 more streets were completed in the street rebuilding program.

Municipal Buildings

CITY HALL, QUINCY, MASSACHUSETTS

The Division of Municipal Buildings, a part of the Department of Public Works, is responsible for the maintenance of the City Hall, the Police Station, the City Home, Welfare Building, City Dispensary, the Atlantic Community Building and the seven fire stations.

This Division also lets out all contracts for the construction of or additions to municipal buildings.

During 1947, one contract was let out for the construction of a new Houghs Neck Fire Station, and one contract was let out for the construction of an addition to the Squantum School.

Principal repairs consisted of relaying floors in the Police Station and Welfare Building as well as repairs, alterations and painting in the Auditor's and Treasurer's Office and in the Police Station.

Harbor Master

The Harbor Master is charged with the patrolling of the 25 miles of Quincy coastline. He is responsible for the checking and tabulation of all incoming and outgoing shipping. All buoys and beacons are checked and reported to the Coast Guard if out of position or extinguished. River and harbor traffic is controlled at all launchings and upon the arrival of ocean-going ships, the channels must be cleared.

During 1947, the Harbor Master reports that shipping consisted of 2,328 tons of coal and more than 130 million gallons of oil.

A total of 194 yachts were stored in the boat yards of the Town River in 1947.

Numerous calls were made to boats in distress, either aground or capsized, during the year. Several bodies of persons drowned were recovered, while several others were rescued and taken from the nearby islands where their craft had run aground.

During the year, the Town River channel was dredged to ease some of the turns and a mooring basin was dredged to a depth of 10 feet in the Town River.

Park Department

The Park Department, under the Board of Park Commissioners is responsible for the physical recreation of the younger citizens of Quincy.

Public playgrounds are in operation by this department in every section of the City. These range from small playgrounds for the group under ten years of age to baseball parks, skating rinks and football stadia for the older groups.

OBSERVATORY — FAXON PARK

The demand for this type of service has increased considerably during the last few years. This is due to the fact that people are becoming more aware of the necessity of supervised recreation as is provided the younger children by this department.

Baseball fields are maintained in every section of the City and hundreds of playing permits are given out each year to teams of all ages in many leagues for the use of these fields.

There are several football fields available for use. One of these being the beautiful Quincy Municipal Stadium, the finest in this section of the State.

During the winter months, various ponds are kept in condition for hockey and skating in general. These are lighted at night, affording more use of skating weather. During 1947, hockey rinks were located at Stony Brae, Manet Lake, and Old Sailors' Home. However, unfavorable conditions prevented the full use of these rinks as there were only ten days of good skating in 1947. Many requests have been

received for the flooding of playgrounds for skating in the winter. Previous experience has proved this to be impracticable as a clay surface is necessary to prevent the water from being absorbed by the soil after it has been sprayed.

During 1947, Macy Park in Ward One and the Kendall Estate in Ward VI were purchased and small playground equipment was erected for children up to ten years of age. Land was purchased at Stony Brae in Ward V and Columbia Street in Ward III for playground purposes. Stony Brae was ready for use in 1947, under a male and female instructor, and Columbia Street has been graded and seeded for use in the near future.

Extensive improvements have been made to O'Rourke Field in West Quincy and to O'Neil and Welcome Young Fields in North Quincy.

Softball is becoming more popular and so the demand for playing fields is increasing. Many baseball fields are being use for this purpose but the shorter playing area required in softball is injurious to these diamonds. The only solution to this problem is the building of more regulation softball fields.

During the year the Park Board had a Baseball, Football and Basketball League in operation and these proved very successful.

During the Fall, seven sets of bleachers in several Parks were condemned as unsafe by the State Department of Public Safety. One of these, in the stadium, was repaired wtihin a week. The others were taken down and an additional appropriation will be sought to have these replaced for use in the baseball season.

A very attractive Field House was erected by the Bowling Green Club, at their own expense, on the Bowling Green grounds.

The tennis courts were made more usable by the accessability of certain equipment which had been unobtainable since before the war. These were in constant use during 1947.

The annual Field Day, the climax of summer playground activity, was its usual success. A great many boys and girls participated and many spectators were attracted by the keen inter-playground competition.

MUNICIPAL STADIUM

It is recommended that field houses be built at several playing fields in the future, at the rate of one each year. Permanent flood lights at the Municipal Stadium and a retaining wall at Maypole Park are also recommended.

MAIN ENTRANCE — MT. WOLLASTON CEMETERY

Cemetery Division

This Division, under the Department of Public Works, is responsible for the administration, maintenance and care of Quincy's two municipal cemeteries, Mount Wollaston and the Hancock Cemetery. The latter is maintained mostly as a public shrine as burials there have become rare.

During 1947, there were 574 burials and 5 removals at Mount Wollaston Cemetery .Heavy snowfall in December made it exceedingly difficult to open graves but all burials were carried out on schedule. This eliminated the necessity of entombing and the delaying of burials until Spring.

The new section on the Sea Street side of Mount Wollaston was graded and plotted into 180 large lots, which will be numbered and then finished in the Spring of 1948 for future use.

Two hundred single graves were laid out in 1947 as well as thirty new lots of four graves each.

Many cemetery streets were repaired in 1947 and it is recommended that some of these should be rebuilt in the near future.

LIBRARY

SCHOOLS

THOMAS CRANE LIBRARY

Library

The Thomas Crane Public Library, as it is now known, was established as the Quincy Public Library in 1871. In 1880 the family of Thomas Crane made a gift to the Town of Quincy of the Thomas Crane Public Library. This was formally dedicated in 1882 and at that time, by a vote of the Town, it was officially called the "Thomas Crane Public Library".

Since that time the Library has grown to such proportions that in 1947 we find it occupying two beautiful buildings in Quincy Square as a central library, and thirteen branches located throughout the City.

As of December 31st, 1947, the Library maintained a book stock of 136,638 volumes; of these 96,058 were adult books and 40,480 were for juveniles. This is a net increase of 3,385 over the 1946 total of 133,253 books. In addition to this, the Library had on hand at the end of the year 3,345 phonograph records and 18,000 mounted pictures, of which 5,967 have been cataloged. During 1947, the Library subscribed to 5,967 periodicals and newspapers. This does not include duplicates and extra copies provided the branches.

Books and periodicals borrowed from all branches and departments amounted to 500,681 items. In addition, 5,520 mounted pictures and 14,533 phonograph records were loaned out. This makes a grand total of 520,734 items loaned out in 1947.

There was a total of 20,507 borrowers' cards on record at the end of 1947; this is an increase of 243 borrowers over the 1946 total.

Further analysis of Library records indicates that there is a growing demand for adult nonfiction. For many years the percentage of adult borrowing was 75% fiction and 25% nonfiction. However, in the past ten years the trend has changed somewhat so that in 1947 we find that nonfiction borrowed was 35% of the total loaned. At the main Library the percentage was 46.3%. This is due to the fact that the caliber of nonfiction is increasingly higher while books in the field of fiction are deteriorating in quality.

In the juvenile department we find a rather interesting note. In 1947, though there were actually 659 fewer children registered than in the previous year, the circulation of juvenile books increased by 5,000. Ths is due in part to the increased stock in children's books; but more so to the efforts of the children's librarian and the branch librarians in simulating interest among the younger people.

The music department, though not operating on a full-time basis, loaned out a total of 15,533 phonograph records in 1947. The advent of a six-day schedule in this department, which can be realized only by the addition of personnel, should find this a more popular and busy department in the years to come.

The library reference department was kept busy with dozens of questions aimed at them daily.

The Readers' Advisor is constantly occupied with preparing reading lists of selected books on a variety of subjects, as well as selecting books to be sent to permanent shut-ins and editing "Leaves from the Library", a weekly book column in the local newspaper.

Thus, by these few preceding paragraphs, it can be seen that the use of the Library is made up of a number of other services besides the circulation of books.

The thirteen branch libraries are located in every ward and district of the City so that there are few, if any, homes that are more than a mile in distance from a library. Though these branches contain but 40% of the total books in the system, they are responsible for two-thirds of the books loaned.

NORTH QUINCY HIGH SCHOOL

School Department

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

Your School Committee submits herewith its annual report for the year 1947.

The report of the Superintendent and the attached statistical tables give the detailed record of the year's activities in our schools and the needs of the future as seen by our staff. It is worth reading by all who are interested in our public schools. We wish in this report to call attention to the major problems met and dealt with during the year and to some of the problems which are still with us.

The members of the School Committee, who serve without pay, devoted twenty-six evenings to meetings of the School Committee to work on these problems. Also, there were many sub-committee meetings. All of these members will continue in serving the schools this coming year with the exception of Mr. L. Paul Marini, the senior member who retired this year after 10 years of service on the Committee. His place will be taken by Mr. Alexander Smith.

School problems naturally fall into three classes: (1) Buildings and Equipment, (2) Curriculum, (3) Personnel—all closely interwoven.

In common with many other cities we have a particularly serious building and maintenance problem. Thanks to cooperation from all concerned, real progress has been made this year in this field. Believing it imperative for the health and safety of the pupils and teachers that our schools be put in a better state of repair, your committee has continued the sharply increased post war maintenance budget. We have created the position of assistant superintendent for Business Affairs and employed Mr. Rudolph Lofgren to see that this increased budget is spent effectively. We are developing our own maintenance crew in order that a systematic program of maintenance can be carried on with less dependence on outside contractors. This program is already bringing results in cleaner, brighter, healthier schools. Also during the year construction began on the Squantum School addition which should be completed in time for occupancy in September, giving that section a thoroughly modern school and the city a standard for comparison.

In the curriculum field the staff has continued its cooperative restudy of the curriculum. It seems clear that our present program, while fundamentally sound by current standards, needs the addition of a kindergarten grade, permitting the upward revision of the entrance age for grade I. We must also consider the eventual expansion of the system to provide for junior college training for the ever-increasing number of high school graduates who need further training. These needs, as well as an increase in physical education, in the practical arts, and in trade training, must be kept in mind in our building program.

Finally, we turn to the most vital field of all—Personnel. It is nice to have good buildings, but the quality of the teaching staff is the most important factor in any school system.

We have taken several steps to improve our staff. We have elected our Superintendent, Dr. Paul Gossard, to tenure, which we hope will assure Quincy of his capable and devoted services for a long time to come. Few people realize how hard Dr. Gossard has worked and the range and scope of the problems he has met and overcome in the three years he has served us.

We have adjusted a number of the salaries of supervisory personnel, with the intention of setting standards adequate to attract and keep first class leaders. Very likely we shall have to make more adjustments.

In accordance with a nation-wide trend, we have substantially increased the general schedule of teachers' salaries. In spite of this increase, our salaries are still not high when judged by salaries in comparable cities and in other professions, and it may be necessary to raise them still further in order to attract and keep the kind of persons we want to teach our children.

Buildings, curriculum, teachers, all cost money, an ever-increasing sum, which sometimes seems excessive to the taxpayer. Your committee is thoroughly aware of this. It believes, however, that the citizens look to it to provide their children with an education adequate to present day needs, and that no taxpayer begrudges the money necessary to meet those needs honestly and well. In that faith we go on into the coming year.

The foregoing report was prepared by Mr. Carter Lee and Mr. William A. Anderson and was adopted as the report of the School Committee for the year 1947.

QUINCY HIGH SCHOOL

QUINCY STADIUM (PARTIAL VIEW) QUINCY HIGH vs NORTH QUINCY HIGH, THANKSGIVING, 1947

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

The annual report of the Superintendent of Schools can well be a stock-taking of the measure of success with which the schools are meeting the problems encountered, and of the plans for carrying on the enterprise of educating the young people of the community in the days ahead. All of this, unfortunately, must be in extremely abbreviated form in the printed report.

From the standpoint of the education that can be measured by standardized tests, Quincy schools did well in 1947, — even better than in the preceding year when it was stated in the annual report that for every grade tested the median score was well above the national norms. Our high school graduates who took the College Entrance Board examinations and who applied for college entrance

are a credit to our schools, and more than the usual number of scholarships this year went to Quincy students. These facts, however, are not a complete measure of the success of a school system. We know that equally important in determining how well the job has been done are the answers to such questions as to how much the school experiences benefited those for whom school work is difficult. Whose strength lied in fields other than in book work, how well the superior students were challenged to use their talents beyond what was needed for passing grades, and to what extent the school experiences made the students honest, loyal citizens. We hope that these results, which are not easily measured, approach those attained in reading, spelling, and arithmetic, but all of us realize that here is a field to challenge the best efforts of those of us who are in any way connected with the schools.

The year has been difficult because of the continually increasing prices, with the resulting necessity of readjusting salary schedules and of having to revise budget requests upward even for the same services and commodities. In November the people of Quincy voted that there should be equal pay for men and women teachers with the same training and experience, doing the same work. The school committee is meeting this mandate by placing all teachers on the revised 1945 salary schedule on the basis of experience, an arrangement that will bring about quickly what the schedule would have made possible some years hence. This action strengthens the position of the schools in the recruiting of new teachers with successful experience, a problem that has plagued us particularly at the elementary school level where the supply of teachers has been extremely inadequate to meet the demands.

Despite high cost of materials and labor excellent inroads have been made on the backlog of repair work and needed improvement of the school buildings during the last two or three years. Given a few more years like 1947, Quincy will have its school buildings in such condition that citizens can justly be proud of them.

The long-term building program should receive further study, and action should be started on planning of additional school space. The greatly increased birthrate of the last six or seven years will create a school housing problem that annually will grow more serious.

In doing the general educational task well the schools must find additional and better ways to adapt education to the needs and interests of students at the secondary school level who are not going to enter college, go into the commercial field, or become members of the skilled trades. The 1948 budget has provisions for starting distributive education, but in Quincy and in other communities here is one of the biggest unsolved problems needing attention.

I take this opportunity to express my appreciation to the School Committee for their unselfish and tireless efforts to make it possible for the schools to render their best service and to the teachers and other school employees for the excellent work that they are doing.

Respectfully yours,

PAUL GOSSARD,

Superintendent of Schools.

GENERAL STATISTICS, DECEMBER, 1947

Population of the City (U. S. Census of 1940)	75,810
Number of school buildings: Quincy High[1], 1; North Quincy High[2], 1; Junior High Schools, 3; Elementary[3], 19; Annex[4], 1; total	[1 2 3 4] 25
Teachers in Quincy High School: men, 19; women, 39; total	58
Teachers in North Quincy High School: men, 22; women, 49; total	71
Teachers in Junior High Schools: men, 18; women, 60; total	78
Teachers in Elementary Schools: men, 4; women, 186; total	190

Clerks: Quincy High School, 2; North Quincy High School, 2; Junior High Schools, 3; Trade School, 1; Elementary, 3; total	11
Coordinate and Auxiliary Agencies: Supervisor of Attendance, 1; Adjustment Service, 2; Nurses, 4; Physicians, 2 (part-time); total	9
Custodial and Maintenance Departments: Supervisor of Custodians, 1; Senior Building Custodians, 14; Junior Building Custodians, 27; Cleaners, 11; Carpenter, 1; Construction Handyman, 1; Painters, 2; total	57
Total number of different persons employed by the School Department	572

[1] Trade School located in Quincy High School Building.
[2] Six-year high school.
[3] Washington School closed because of decreased enrolment.
[4] Used as offices for supervisors and storage space.
[5] One included in Junior High Schools.
[6] One is teacher of the physically handicapped.
[7] Four teach in Quincy High School, one at North Quincy High School, two at Quincy Point Junior High School, one in an elementary school, one is an elementary school principal, one is a teacher in the physically handicapped class, one teaches in Trade School.
[8] One is an elementary school principal, one teaches in the North Quincy High School.
[9] One is an elementary school principal.
[10] Six teach also in Trade School.
[11] Two teach also in Trade School.

SECTION IX

WATER DEPARTMENT

WATER DEPARTMENT — PENN STREET SHOP

Water Department

During 1947, more than 6,000,000 gallons of water were consumed each day by the people of Quincy. This is an average of 72 gallons per day for every man, woman and child in the City.

The City of Quincy buys water from the Metropolitan District Commission. This water originates at the Quabbin Reservoir. From that point it passes to the Wachusett Reservoir, the Chestnut Hill Pumping Station and into Quincy.

There are eight storage reservoirs in the water distribution system with a total capacity of 9,527,000 gallons. These reservoirs are located at Cranch Hill, Penns Hill, Houghs Neck, Squantum, Breakneck Hill, and Forbes Hill. The latter, comprising a reservoir and standpipe, belongs to the Metropolitan District Commission and has a total storage capacity of 5,430,000 gallons.

During the year 1947, 4,301 feet of main pipe were laid. This brings the total mileage of main pipe to 204.8 miles in use as of December 31, 1947. There was a total of 10,810 feet of service pipe laid in 1947, making a total of 801,228 feet in use at the end of the year.

The 219 meters installed during 1947 bring the total meters in use to 17,316; thus 99.4% of water services in the City are metered.

Contrary to popular belief, the average daily consumption of water does not change significantly from season to season. More water is used in the Summer than in other seasons, but the amount of water consumed in the winter months is surprisingly high.

Financial statements containing expenditures and receipts of the Water Department for 1947 may be found in the Auditor's Report (Financial Section)

RETIREMENT

City Auditor

May 25, 1948

To His Honor the Mayor and
the Honorable City Council:

I submit herewith the financial report of the City of Quincy for the year ending December 31, 1947.

In compliance with Section 50, Chapter 41 of the General Laws, there is appended a certificate under oath with reference to the verification of cash balances in the hands of the City Treasurer and various trustees having custody of funds..

Respectfully submitted,

LEO E. MULLIN,
Auditor of Accounts.

I hereby certify that I have verified, by actual count of the cash and verification of the bank balances, the cash of the City Treasurer, the Board of Managers of the Adams Temple and School Fund, the Board of Managers of the Woodward Fund and Property, and the Trustees of the Thomas Crane Library.

LEO E. MULLIN,
Auditor of Accounts.

Norfolk, ss.
Subscribed and sworn to before me this day.

ANNA L. GELOTTE,
Notary Public.

Annual Appropriations

Order No. 105 February 3, 1947

ORDERED:—

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1947 and ending December 31, 1947, to be expended by and under the direction of the several officers or boards as herein designated.
